

# ARTiZINNOVATIVE

AN EXPERIMENTAL ARTS PROGRAM BY FLYING ARTS ALLIANCE AND THE EDGE, STATE LIBRARY OF QUEENSLAND

Join us at The Edge, State Library of Queensland for this art intensive program! Explore areas of cutting-edge artistic practice blending art, science and technology. Learn about innovative materials, and experiment with groundbreaking approaches to art making.

## PROGRAM

### ELECTRO-GRAPHIC WALLPAPER

Design and fabricate a woodblock for printing onto wallpaper. Working with thermal reactive inks and paper, you'll use your woodblock to print onto wallpaper and other materials that will then react to hot and cold!

### WEARABLE TECH

Learn creative ways electronics can be integrated into clothes and accessories. Create unique pieces of wearable, interactive technology using code, sensors and Arduino. Advanced options will be available for returning students.

### GROWABLE TEXTILES

Fungi, bacteria, slime, algae – microorganisms are the exciting new medium emerging from collaborations between artists and bio scientists. Learn how to grow your own textiles from kombucha tea. Experiment with moulding, cutting, sewing and dying to turn your organic textile into fashion or art. Advanced options will be available for returning students.

### REGIONAL STUDENTS!

Supervised accommodation for the program is provided on a twin-share basis. You may be eligible to receive a travel subsidy to assist you to attend Artiz Innovative. Please contact Flying Arts for details.

Registrations close Monday 15 May

FLYINGARTS.ORG.AU/WHATS-ON/ARTIZINNOVATIVE

Join us for a unique blend of art, science and technology in this immersive residential program for young artists. Experiment with innovative approaches to art-making!

**27 JUNE - 30 JUNE 2017**

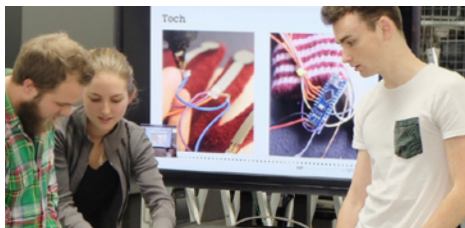

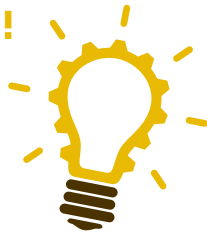

Artiz Innovative is presented at The Edge, State Library of Queensland, Southbank.

## WHY PARTICIPATE?

- Socialise with like-minded students
- Experiment with innovative, cutting-edge methods, materials and technologies
- Learn from experienced industry mentors
- Explore future career opportunities

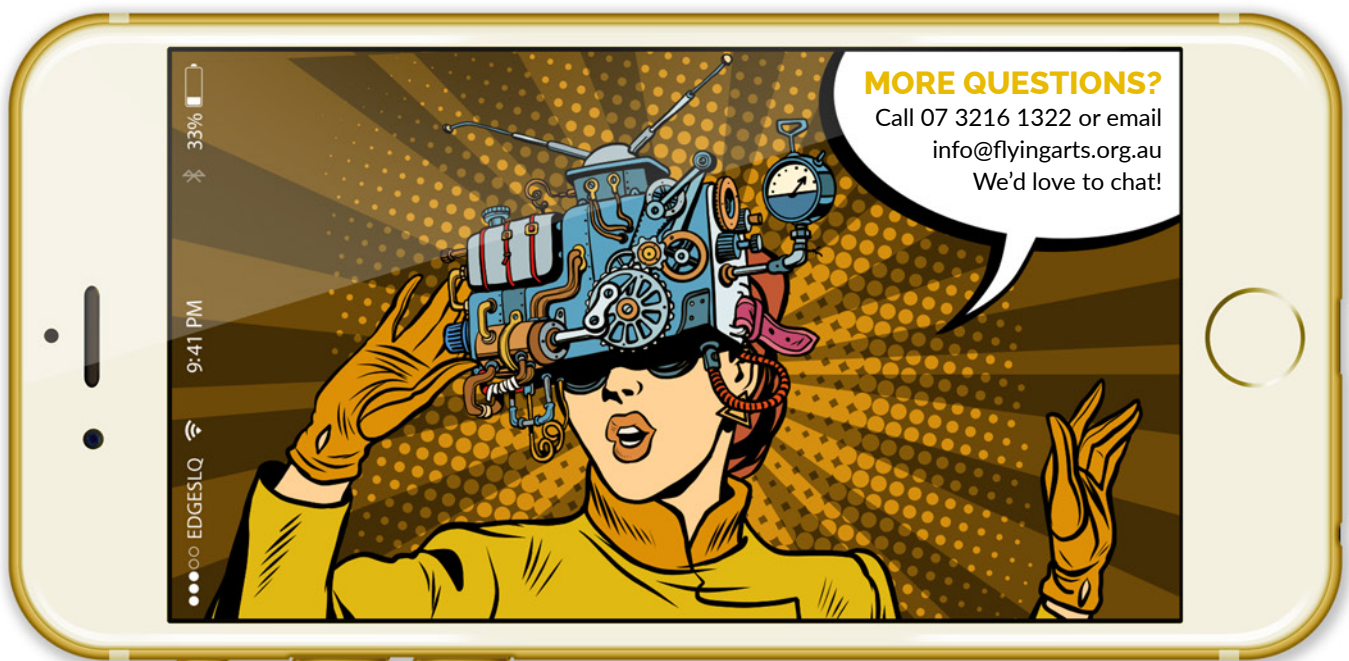

## EXPERIMENT - HAVE FUN!

- Try your hand at electronics
- Design interactive technologies
- Create thermal-reactive prints
- Grow your own organic textiles
- Collaborate with new friends!
